Comfortable  
push wheelchair

*Maximum comfort  
30° tilt-in-space  
Excellent driving  
Available with  
PowerSupport  
attendant control*

**Ibis XC. When comfort can make a difference.** Perfect seating posture and comfort are crucial for the more dependent individual, at home or in a hospital. For this reason, the Ibis XC push wheelchair incorporates the individually adjustable Sedeo seating system. A person's seating posture can easily be changed with our easy to operate 30° tilt-in-space adjustment, providing comfort while helping to prevent pressure problems. Due to its modular design and wide range of adjustment options the Ibis XC can also be fully customized to satisfy the specific requirements of the individual. At the same time, the wheelchair can be adjusted to suit anyone and is, therefore, very easy to re-use, which is a crucial factor in a nursing home. We understand that excellent driving characteristics and ease of use for the therapist or carer are crucial. The state-of-the art PowerSupport attendant control provides extra support when needed.

# IBISXC

## Maximum comfort

The fully individually adjustable Sedeo seating system provides excellent physical support and maximum comfort.

## 30° tilt-in-space

Easy to operate 30° tilt-in-space adjustment allows for optimal variation in seating posture.

## Excellent driving

The position of the wheels can be easily adjusted ensuring a smooth and gentle ride and maximum manoeuvrability at all times.

## Available with PowerSupport attendant control

The user-friendly PowerSupport attendant control offers extra support when needed, providing freedom to move, together.
